## WHO-FIC Education and Implementation Committee (EIC)

### Strategic Work Plan – 2019

**Member contribution to work program**

<table>
<thead>
<tr>
<th>Priority</th>
<th>Task</th>
</tr>
</thead>
</table>
| **EIC 01** | a. Revision of WHO Family of International Classifications Website  
• Identification of content issues regarding existing ICD-11/ICF/ICHI information  
b. Update website for currency and consistency across all WHO classifications | 28 February 2019 |
| **EIC 02** | a. Development of an ICD-11 Flyer to showcase ICD-11 value/benefits over ICD-10 (4 page folding booklet)  
• Attractive/Understandable presentation of flyer for country decision makers  
• Consumable by wide audience including member and non-member states  
• Succinct with the ability to be distributed/circulated (paper and electronic formats)  
• Flyer to also market the new 'value add' functionalities of ICD-11  
• Flyer to demonstrate/provide examples of the value add features (e.g. postcoordination, searching via acronyms, use of WHO classifications together (e.g. ICD/ICF) | 15 March 2019 |
| **EIC 03** | a. Development and coding of term sets in ICD-11 for ICDFit  
• Undertake coding in ICD-11 for both mortality and morbidity term sets (nationally and internationally)  
• Demonstrate/show examples where ICD-11 is simpler or more accurate/specific than ICD-10 for coding mortality and morbidity term sets  
• Include both complex and simple diagnostic statements for the term sets  
• Review existing term sets and determine specific areas where ICD-11 is an improvement on ICD-10 | 31 March 2019 |
| **EIC 04** | a. Validation of gold standard for ICDFit  
• Garner input from MbRG and MRG  
• How to manage over and under coding in ICD-11 clusters (e.g. premature babies with associated conditions)  
• Develop performance criteria/algorithm that is robust and dependable | 15 April 2019 |
<table>
<thead>
<tr>
<th>Priority</th>
<th>Task</th>
<th>Estimated deliverable date</th>
</tr>
</thead>
</table>
| EIC 05  | a. Testing/Review of ICD-11 electronic training tool (developed outside of EIC)  
- Develop morbidity and mortality criteria that the electronic training tool can be tested against  
- Test all elements for mortality coding, morbidity coding and functioning assessment (i.e. Supplementary V Section)  
- Test functionality with respect to all new ICD-11 mechanisms (e.g. postcoordination, mortality and morbidity rules, patient safety, functioning assessment)  
| TBC – This task’s deliverable date will be based on when the outside development of the ICD-11 electronic training tool is completed |
| EIC 06  | a. Review and Finalise ICD-11 transition/implementation guide and materials | 15 May 2019 |
| EIC 07  | a. WHO-FIC Implementation  
- Review the WHO-FIC Implementation Database (taking into consideration the work already undertaken by EIC by Joon and Carol) with regard to simplification of the questions)  
- Investigate options for redevelopment of the database to improve functionality, visualisation and interactive interrogation of the information contained within the database  
- Consider the relocation and hosting of the Implementation database | 15 May 2019 |
| EIC 08  | a. Review outdated WHO-FIC classifications information sheets  
- Assess all existing information sheets as to whether they are still required  
- Update those information sheets that are still required  
- Develop new information sheets for ICD-11 and its various use cases (e.g. functioning assessment, patient safety)  
- Review existing and where appropriate, develop new information sheets for ICF, ICHI  
- Develop an information sheet on how the WHO-FIC classifications can be used together  
- Determine how best to present these information sheets on the new EIC website (as per EIC 01) | October 2019 |
| EIC 09  | a. Review and update International assessment strategies  
- Work with ICDFit to develop morbidity and mortality exam questions, scenarios  
- Review and recode the ICD-10 training material for ICD-11 purposes  
- Develop mortality case scenarios for identification of cause of death by physician and then coded using ICD-11 mortality rules  
- Develop a sustainable process for recertification exams for both mortality and morbidity | October 2019 |
| EIC 10  | a. ICHI Education and Implementation  
- Develop criteria for assessment of ICHI learning training materials  
- Review ICHI Field Testing training materials when developed  
- Review ICHI learning and training materials leading up to the release of ICHI | TBC once ICHI is finalised for field testing |
