SNOMED CT is the clinical terminology chosen to replace Read codes within the NHS. Systems used by, or communicating coded clinical data to General Practice service providers must use SNOMED CT as the clinical terminology within the system by 1 April 2018.

### New!
- Two additional regional workshops for providers of GP IT services are now available in October 2017; ensure your providers register [here](#) if they have not yet attended and they require support.
- A “Data Quality” webinar is now available, *(28 September 2017)*, please register [here](#).
- A “Designing Queries” support [document](#) is now available to compliment the [webinar](#).
- A series of short-recorded [presentations](#) and a supplementary document are now available to support those who need to add SNOMED CT in their data warehouse.

### Reminders!
- Two new [fact sheets](#) are available on Delen regarding “Dual Coding” and “Mapping from Read to SNOMED CT”.
- An updated version of [data quality guidance](#) was issued in July 2017.
- The “Supplier Implementation Approach” [documents](#) are available from EMIS and Microtest. Vision and SystemOne will be published when they are available.

### Tips!
- There is a non-collaborating public facing [Delen website](#) where all our resources are available – GP practices can access this.
- Check supplier communications for updates on your particular system.
- Gain familiarity with SNOMED CT by using the online [browser](#) – check the SNOMED CT equivalent code.
